

Open Ended Stimulus Pictures Ideas Bank

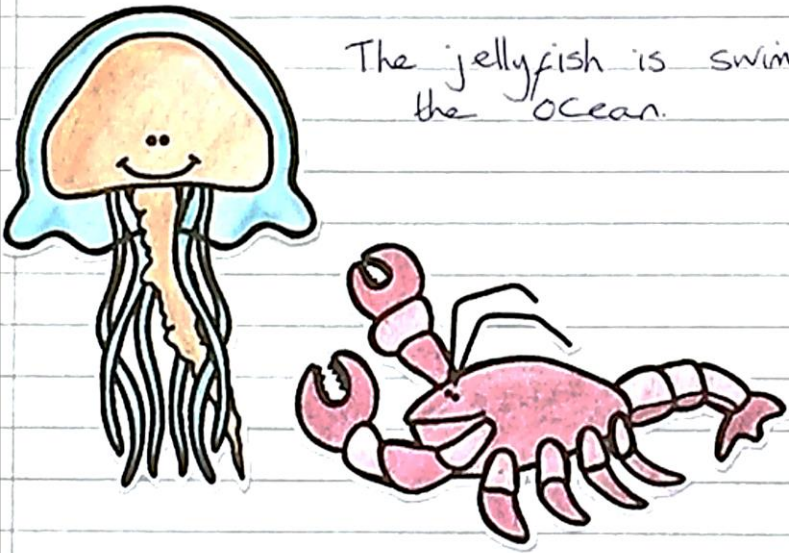

The following pages give you a visual ideas bank for the use of the open ended stimulus pictures.

This is the second sheet in each theme and contains slightly larger images (for easier cutting and because they do not need to be used in conjunction with the smaller background scenes.)

For each theme you will find images to target the most common language goals in a way that makes them accessible for mixed groups and encourages generalisation and carryover of drilled targets.

There are multiple ways to use each picture but the following pages contain a quick and easy reference guide to some common ideas.

In most cases, the verbal response is what is expected from your students. The writing can be omitted, completed by the student (if able), the SLP, or as homework.

The jellyfish is swimming in the ocean.

The lobster has claws to attack.

Expanding Utterances

Bucket

You use a bucket on the beach.

The bucket has shells inside.

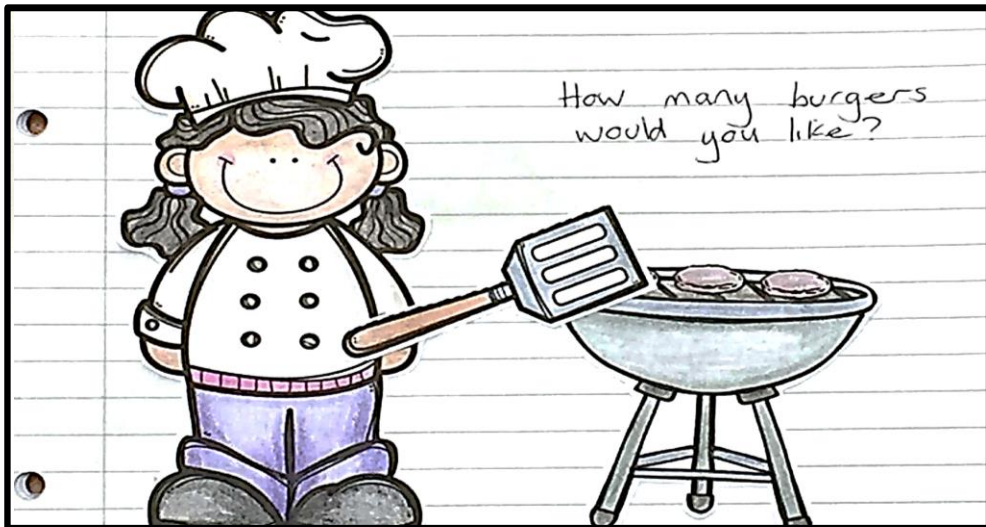

This bucket has a yellow handle.

The bucket is red.
