- Print a copy of the board games and laminate the pages to create durable, reusable therapy resources for your Speech Room.
- Use counters and dice or spinners from any board game set.
- Ave players take turns to roll or spin and move around the board.
- When they land on an image square, they must drill their articulation target. The SLP can choose whether they say the target word once, say it in a sentence, say it multiple times etc. according to each student's level of ability.

All boards are provided in both color and black line versions to reduce printing demands or to send home for practice with parents.
