

Your students will love practicing their target sounds with this fun Articulation BINGO game!

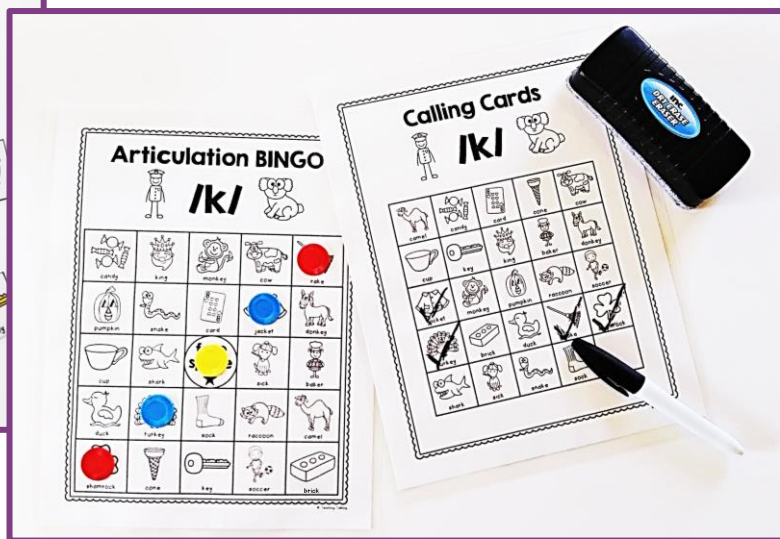

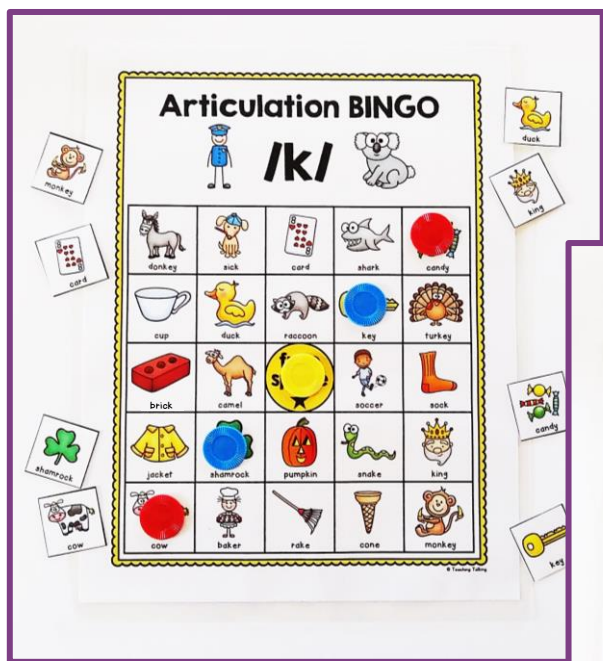

First, laminate the pages to create a durable, reusable therapy resource for your Speech Room.

Each sound comes with six unique BINGO cards and a sheet of matching calling cards.

You may choose to cut the images from the calling card page and store in a paper bag, cup, or any other storage device to be pulled from during gameplay.

As an alternative, the calling cards are designed to stand alone as well. Use a dry erase marker to score the images as they are called. No cutting necessary!

All cards are provided in both color and black line versions to reduce printing demands or to send home for practice with parents.
